WATER SECURITY OUTLOOK

NOVEMBER 2016

South Gippsland Water

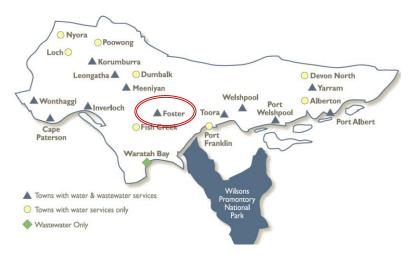

The town of Foster receives its water supply from a 19 ML weir on Deep Creek. Water harvested from the creek can be transferred to Foster Dam, which has a capacity of 233 ML and a raw water basin of 27 ML capacity. The supply system storage allows water harvested in a wet year to be stored and then supplied to customers in a dry year.

Foster Water Supply System

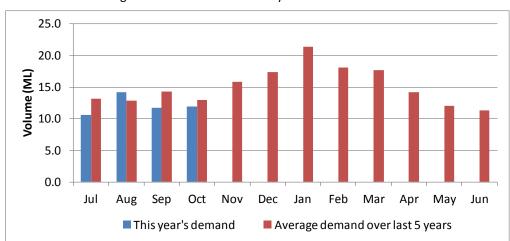

Water Supply Information

Water resources held by South Gippsland Water for the Foster Water Supply System are shown below. Only 15% of the available annual entitlement has been used from Deep Creek Reservoir in the current year to date (Jul-Oct 2016). This entitlement is a legal right to access water, subject to availability.

Water Component	Maximum Annual Entitlement	Volume Extracted 2016-17	Volume Remaining 2016-17
Deep Creek Reservoir	326 ML	48 ML	278 ML

Water Consumption

Monthly water consumption for the Foster Water Supply System in the year to date has mostly been below the average demand over the last five years.

WATER SECURITY OUTLOOK

NOVEMBER 2016

Further Information:

- The Foster Water
 Supply System
 Storages were 100%
 full at the end of
 October.
- Volumes shown in the storage outlook are start of month values in megalitres (ML), where 1 ML is equivalent to 1 million litres (or roughly one Olympic sized swimming pool).

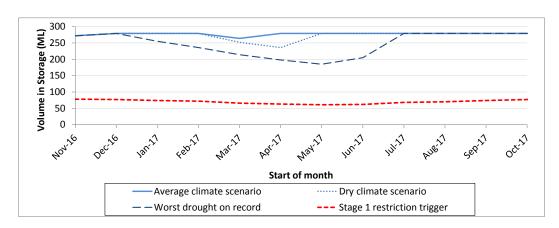

Climate ConditionsForecast climate conditions for the

Forecast climate conditions for the coming three months have considered the Bureau of Meteorology's seasonal climate forecast for the region and local climate conditions in the year to date. The Bureau's climate outlook indicates that rainfall over the next three months is likely to be similar to the long-term average. Winter/spring rainfall in the year to date has been average to slightly below average, however rainfall in the most recent month (October) was more than 25% above average across much of South Gippsland. Air temperature is forecast over the next three months to be higher than the long-term average for this time of year, but any increase in demands from these higher temperatures is likely to be moderated by the anticipated rainfall. After taking these factors into account, South Gippsland Water is forecasting on the basis of an average climate scenario, which is characterised by streamflows into the Foster storages that are similar to long-term average values.

Chance of Exceeding	Chance of Exceeding Median	This Year's	Likely Outlook
Median Rainfall	Maximum Temperature	Spring Rainfall	Scenario
50-55%	65-70%	Average	Average

Urban Water Restrictions Outlook

The volume in storage outlook for the Foster Water Supply System for the period November 2016 to October 2017 indicates that storage levels are expected to remain high relative to water restriction triggers over the coming year.

Based on the volume in storage outlook and the Bureau of Meteorology climate forecast, no water restrictions are anticipated for the remainder of the year at the current time. South Gippsland Water's Permanent Water Savings Plan applies to all customers over the outlook period.

Climate Scenario	Outlook		
	1 Jan 2017	1 Apr 2017	1 Jul 2017
Wet	PWSP	PWSP	PWSP
Average	PWSP	PWSP	PWSP
Dry	PWSP	PWSP	PWSP
