

BE A REFILLER

REGISTER NOW

Thanks for joining the movement!

Following this summer's fires, many local communities who don't have reticulated water have experienced smoke tainted tank water.

As a result, many people have no access to safe tap water and are relying on bottled water, which has both cost and environmental implications. By registering as a Refiller, you're helping support our local communities and protecting our environment from plastic waste.

So a big 'Thank You' from us!
