Wonthaggi Water Supply Remedial Repair Works

South Gippsland Water is planning to do remedial repair works to the Wonthaggi Water Supply System next Monday 14th April 2014. These are essential repair works that will improve the reliability of the town's water supply.

These repair works may affect customers in Wonthaggi, with water pressure being reduced within the township. Low pressure may be experienced in parts of the township, particularly those elevated areas and high-points within the system. There are no plans in place to fully interrupt supply, however pressure may be affected.

South Gippsland Water is planning to commence works from 9.30am with work due to be completed and full water pressure resumed by 3.30pm on Monday 14th April 2014.

South Gippsland Water will aim to minimise impacts to customers during this work and appreciates their patience whilst these repairs are undertaken. Water quality should not be affected, however any customers with queries or concerns should contact South Gippsland Water on 1300 851 636.
