

South Gippsland Water Farewells Rob McKaige.

South Gippsland Water last week said farewell to their long-term Technical Services Manager Rob McKaige.

Rob has been at the Corporation for the past 20 years and has been instrumental in key capital works projects across the region throughout that time.

Rob in his speech recalled being asked at his interview in 1996 how long he expected to be at South Gippsland Water. After reviewing the then Capital Works Program he estimated approximately five years.

Now twenty years on, Rob is leaving the Corporation having fulfilled that initial Works Program and having delivered a myriad of projects including the completion of five new sewerage schemes, six water treatment plants and various upgrades to the 18 reservoirs and 1,141km of pipeline across the region.

Current and past staff joined to farewell Rob last week. Past Managing Directors and Board Chairs joined with the well-wishers to thank Rob for his 20 years of dedicated service to the Corporation and success in his future endeavours.
